What's the midterm commercial potential of wind energy vs. biomass energy

Asked at the Distributed Energy for Rural Prosperity Conference, Renaissance Hotel, Denver. Each week, we ask members of the high tech community to comment on a timely topic -and bring their responses to you. Voice your opinion online at: www.frtechbiz.com

Ronal Larson,
Secretary and Chair, Colorado
Renewable Energy Society,
Golden

"I see wind as being ahead of the biomass area."

Leon Sparks,
Superintendent,
Lamar Power and Light,
Lamar

"People have pretty much been riding the waves of wind, but biomass is plugging along."

Scott Haase, Program manager,
McNeil Technologies, Lakewood "I believe wind is going to continue along its path. Biomass has a lot more potential opportunities with the technologies being developed right now."
